CAREER OBJECTIVE

BCA graduate with hands-on experience in full stack development through an industry internship and academic projects. Skilled in programming, web technologies, databases, and cloud fundamentals, with practical exposure to AI, Blockchain, and IoT. Seeking an entry-level Software Developer or IT role to apply my technical skills and grow within a professional environment.

EDUCATION

Bachelor of Computer Applications | CMR University, Bangalore, Karnataka, India

2023 - 2026

Major Subjects: Cloud Computing, Blockchain, Artificial Intelligence

INTERNSHIP EXPERIENCE

Full Stack Development Intern | EduPhoenix Solutions Pvt. Ltd., Bangalore

June 2025 - August 2025

- Completed a hands-on internship focused on Full Stack Development, gaining practical exposure to end-to-end web application development.
- Recognized by the organization for being punctual, hardworking, and inquisitive throughout the internship.
- Applied front-end and back-end development concepts to build and troubleshoot functional web features under real-world project conditions.

CORE SKILLS

Programming Languages: C, Java, Python

Web Technologies: HTML, CSS, Full Stack Development Basics

Database: SQL, DBMS Basics

Cloud Computing: AWS Fundamentals (EC2, S3, Virtualization), Microsoft Azure Basics

Operating Systems & Tools: Linux, Git, GitHub, VS Code, Google Cloud Shell, Shell Scripting Basics

Other Technologies: AI Basics, Blockchain, IoT, Cybersecurity Fundamentals

Soft Skills: Problem Solving, Quick Learning, Team Collaboration, Communication, Active Listening, Research, Adaptability

ACADEMIC PROJECTS

Decentralized Voting System (Blockchain)

- Built a decentralized voting application using blockchain technology on Ethereum's Sepolia Testnet.
- Implemented smart contracts to ensure transparent, tamper-proof, and secure voting without a central authority.
- Used Solidity for smart contract development and integrated Web3 tools for frontend interaction.

AI Chatbot

- Developed an AI-powered chatbot capable of understanding and responding to user queries intelligently.
- Integrated natural language processing (NLP) techniques to handle conversational flows.
- Designed for extensibility to support multiple use cases including FAQs and task automation.

Digital Voting Machine

- Developed a secure digital voting system with authentication features.
- Ensured data integrity and basic security mechanisms.

E-commerce Website

- Created a full-featured e-commerce web platform using HTML, CSS, and JavaScript.
- Implemented product listing, cart, and basic checkout flow.

CERTIFICATIONS & TRAINING

- Cloud Computing - NPTEL (Online Course)
- Introduction to Python Programming - Online
- Git & GitHub Basics - Online
